

| High Quality Custom Rubber Extrusions

**Best Quality, Highest Precision,
Lowest Turnaround Time,
Any Size and Shape.**

About Us

Silicone Concept Inc, has been preserving a solid presence in the custom-manufacturing field. We are manufacturers and fabricators of food grade silicone tubing, surgical / medical purpose tubing and pharmaceutical tubing. We also manufacture, convert and distribute: extrusions, moldings, sheeting, gaskets, seals and rubber matting in natural and synthetic rubbers. In house mixing and tooling permits us to offer the fastest turnaround and delivery flexibility.

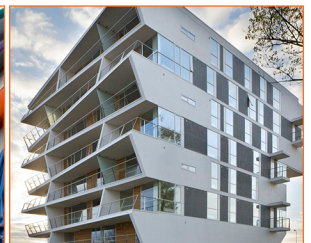

We are not just a manufacturer, we also assist hundreds of customers to define their requirements and provide resourceful design related help to solve their problems. We truly listen to your problems and provide cost effective solutions whenever needed.

Materials We Work with

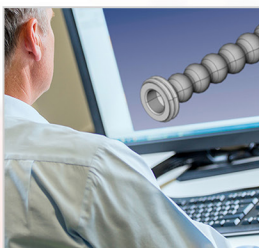

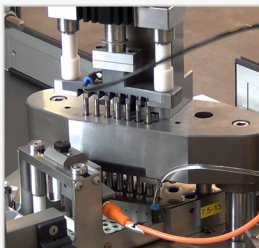

- Silicone
- Fluoro silicone,
- FDA Approved Silicone
- NSF Silicone
- Conductive Silicone
- EPDM and Neoprene Sponge
- Nitrile
- EPDM
- Neoprene
- Viton
- FKM

Typical Applications for Rubber / Silicone Extrusions

- Dairy Seals And Fluid Handling Tubing
- Peristaltic Tubing
- Aerospace and Military Seals And Gaskets
- Medical Equipment Seals And Tubing
- Water Purification and Filtration Seals And Tubing
- Building & Constructions
- Outdoor Electrical Enclosures
- Wire & Cable

Our Services

We provide wide variety of services, from extruded rubber splicing to pharmaceutical tube manufacturing.

Custom Extrusion

Silicone Concept Inc. manufactures and supplies a number of silicone extrusions used in wide variety of industries. We maintain good inventory of industry's standard shapes and sizes for instant delivery. Silicone concept inc. will create custom tooling if necessary to give you a product that meets the specifications of your Application.

Secondary Operations

Silicone Concept inc. offers a wide variety of secondary machining and assembly options for our customers upon request. We work with industrial customers and original equipment manufacturers in whole the USA, for those who are in need of high quality rubber extrusions, tooling design assistance and secondary operations.

Die Cutting

Silicone Concept Inc. is one of the leading companies in Die Cutting technology, with 25 years of experience in advanced Die Cutting procedures. We guarantee to deliver highest quality products in the market, always on time. This will lead to increased profitability and less turnarounds for our customers.

Rubber Molding

Silicone Concept inc. is a manufacturer and Supplier of molded rubber parts that is produced using high quality raw materials. The products that we offer are durable, precise and meets international quality standards. Our advanced manufacturing facility is capable of delivering rubber products of all sizes and shapes.

Rubber Sheetting

The Silicone Concept Inc. offers more than fifty different grades of rubber sheetting. Available in a range of thickness and supplied in roll, sheet and strip form. There are wide variety of uses including flange gaskets, industrial gaskets, Medical and food processing, weather sealing, chemical applications, etc.

Engineering Design Services

Silicone Concept inc. is providing innovative engineering and design Services to our clients for more than 25 years. We are specialized in application and product engineering. Our best fit production process will result in the best components for your applications.

Get In Touch

We deliver on time high quality products. Please feel free to contact us at any time.
